Category:Products introduced in 2011 Category:Analog to digital convertersAdidas Summum Adidas Summum is a joint venture between German sportswear company Adidas and Swedish sportswear company Peak Performance AB. It produces Adidas running shoes and clothing. Initially a joint venture between Adidas and Swedish footwear brand Peak Performance AB. As of 2012, Adidas is no longer a partner in the joint venture, since Peak Performance AB was sold to Chinese sportswear giant Anicina in 2015. History In April 2006, Adidas bought Peak Performance for \$31.8 million and formed a joint venture with Peak Performance to produce athletic clothing. In October 2009, the joint venture was expanded into running footwear with the launch of the X-Basis. Geraniol and thymol are monoterpene aldehydes that have been shown to have anti-cancer and anti-inflammatory effects. However, the mechanisms of their inhibition of various cancer cells remain to be elucidated. In this study, we investigated the anti-cancer effects of geraniol and thymol on mouse colorectal cancer (CRC) cells and elucidated the mechanisms involved. In the Mouse CAC15 cell line, thymol showed a greater inhibitory effect than geraniol, while it was the opposite in the HT29 cell line. Geraniol and thymol inhibited proliferation and colony formation, and induced apoptosis and G2/M phase arrest of HT29 and CAC15 cells. Geraniol and thymol also inhibited tumor growth in HT29-xenografted nude mice. Geraniol and thymol inhibited the expression of cyclooxygenase-2 (COX-2) and prostaglandin E2 (PGE2) production in the mouse CAC15 cell line. Geraniol and thymol enhanced the binding activity of peroxisome proliferator-activated receptor γ (PPAR γ) in HT29 cells, but reduced it in mouse CAC15 cells. Although PPAR γ is known to play a key role in the regulation of COX-2, f678ea9f9e
